

How to

Verify Domain on Facebook

with Blink

Before you begin

Make sure that you have access to a Business Manager account or create one

Check that you're an admin on the Business Manager account that you'd like to use

Log in to Facebook Business > Select Business

Select business ➕ Create Business

| | |
|--|---|
|  <p>1 ad account · 2 Pages · 6 people</p> |  <p>1 ad account · 1 Page · 3 people</p> |
|  <p>2 ad accounts · 2 Pages · 2 people</p> |  <p>3 ad accounts · 3 Pages · 4 people</p> |
|  <p>1 ad account · 1 Page · 5 people</p> |  <p>1 ad account · 0 Pages · 4 people</p> |

Select Settings Icon on Bottle Left Corner

Click Brand Safety from Left Panel >
Select Domains

Click Add

Filter by name or ID 

Add

blinkco.io **Verified**
Owned by: blinkco.io ID: 4298915893473360
Permissions given: View events, Manage events

 Add Assets

Enter Website URL
> Click Add

Add a domain ✕

Add the correctly formatted domain that you want to associate with your business.

You can only verify the root domain (example.com), not a subdomain (store.example.com) or subpage (example.com/store). Do not add prefixes (http:// or https://) at the beginning.

Your domain

Domains can only be added to one business but can be shared with designated partners.

Cancel Add

Click on the meta-tag to copy

 **example.com** Not verified
Owned by: Blink Technologies ID: 771005753815613 Remove

Verify your domain
Select one option

Add a meta-tag to your HTML source code ▼

Add a meta-tag
Verify this domain by copying and pasting the provided meta-tag code into the `<head>` ... `<head>` section of your website's home page HTML code.

Copy to clipboard tag:
`<meta name="facebook-domain-verification" content="jv8rnbxsc8k8hpcn75qbm0gtk3klsu" />`

2. Paste the meta-tag into the `<head>` ... `<head>` section of the website's home page HTML source, and publish the page.
Note: Verification will fail if the meta-tag code is outside the `<head>` section or in a section loaded dynamically by JavaScript.

3. After you've published the home page, confirm that the meta-tag is visible by visiting <http://example.com/> and viewing the HTML source.

4. Click **Verify domain**.
Note: It may take up to 72 hours for Facebook to find the meta-tag code. If the domain status is still not verified, you'll need to click **Verify domain** again or confirm the meta-tag is listed in the scrape results in the [Sharing Debugger Tool](#).

Verify Domain

Paste Metatag on an Email
with Brand Name/Website, and send to

techsupport@blinkco.io

support@blinkco.io

Use Subject: (Brand Name) FB Domain
Verification

Domain will be ready for verification within 2-
3 working days
